

BOSCOM FIBRE OPTIC BREAK OUT TRAY (FOBOT)

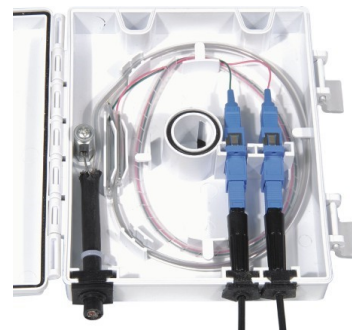

External 2/4 Core Break Out IP 65

Product Description

The BOSCOM External 2/4 Core IP65 FOBOT is used as a termination point, where both the feeder cable and drop cable meet. This versatile FOBOT is the perfect distribution unit for securing THRU Adapters and splice protectors, keeping the distribution of fibre tidy throughout. The BOSCOM FOBOT provides solid protection against weathered environments and can be used both indoors and outdoors.
