

## **BOSCOM FIBRE OPTIC BREAK OUT TRAY (FOBOT)**

### **Compact Surface Mount FOBOT with Sliding Front Protector**

#### **Product Description**

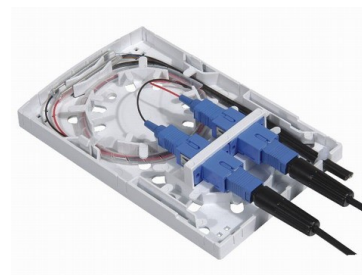

---

The BOSCOM compact surface mount FOBOT is used as a termination point, specifically for internal use. This versatile compact FOBOT is perfect for the distribution of extension fibres or incoming lead-in cable. The sliding front protector adds an extra level of safety, reducing the exposure of its connectors and laser signals. Through adapters and splice protectors are secured nicely in their individual sections keeping a tidy appearance throughout.
